

A universal hospitality anti-microbial remote that stands up perfectly on surfaces

The Hotel Preferred FreshRemote is a flat surface remote with a non-absorbent bezel which makes it hard for bacteria to stick and a breeze to disinfect. This is a huge benefit in light of the studies done by universities which confirmed the germiest spot in a hotel room by far is the TV remote control. Since cleanliness is one of hotel guests' top two priorities – the other is safety – buying FreshRemote is one of the simplest solutions to ensure your guests keep coming back.

Product Features

- Universal remote control with water-proof coating
- 2-in-1 control for TV/Sat/Cable/IPTV
